Why Infor? Ranked #1 for six consecutive years

Highest score in Gartner® Critical Capabilities Process Manufacturing Use Case

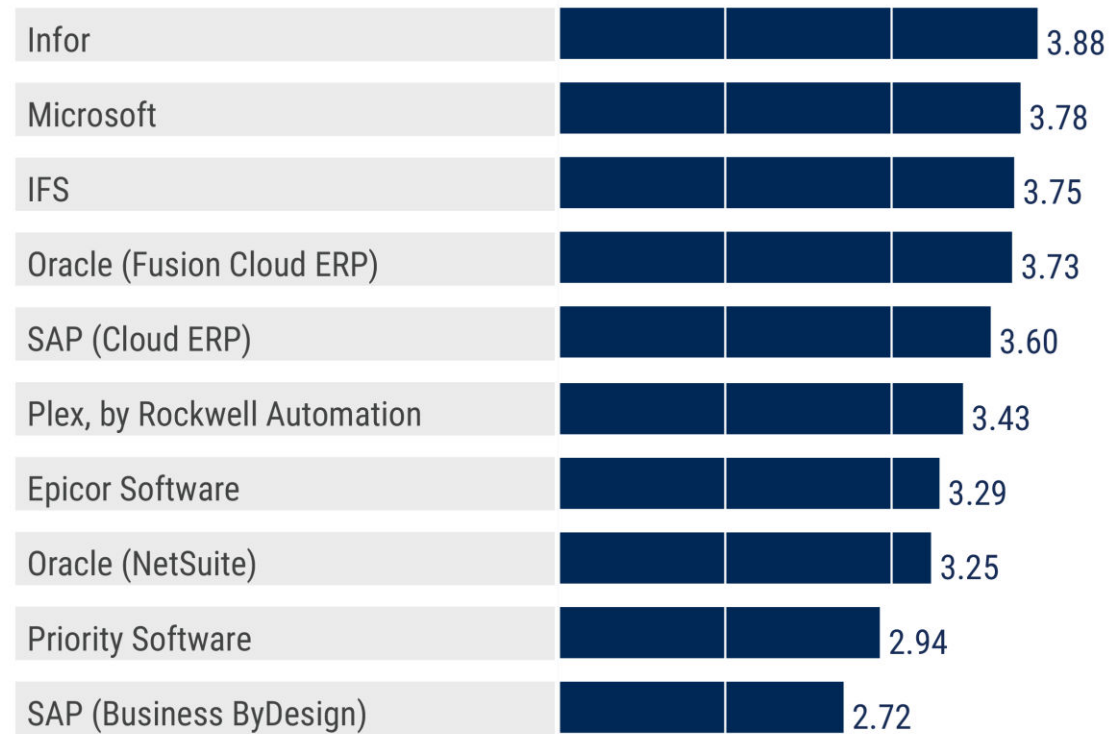

Infor received **3.88 of 5** in use case scores for Process Manufacturing in the 2025 Gartner® Critical Capabilities for Cloud ERP for Product-Centric Enterprises.

According to the Gartner® report

“Infor CloudSuite achieves high scores for project/asset-intensive, process and discrete manufacturing, and erp for lower-mid use cases, **attributed to its deep industry-specific functionality and the robust Infor OS platform.** Key capabilities include advanced composable services, Data Fabric with a new data warehouse option, extensive robotic process automation (RPA), and embedded AI/ML services leveraging AWS Bedrock.”
